

Wheat Pasting

Supplies:

Wallpaper pasting brushes
Wheat paste or wallpaper paste
Image

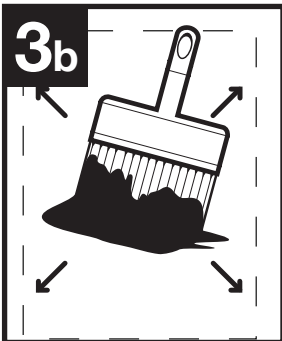

Find an image to paste.
Printed preferably on a thin
or light weighted paper.
(This ensures permanence.)

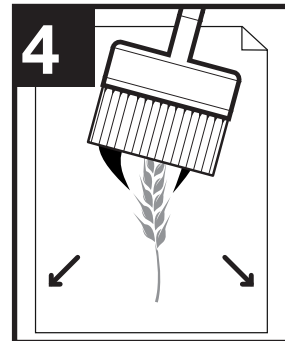

Saturate brush with paste.

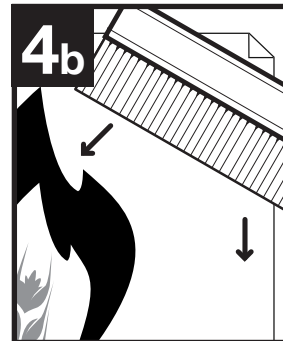

Cover back side of the
paper with paste making
sure the corners are
especially saturated.

If the paper is larger than
tabloid or A3 sizes, apply
paste to the surface. Make
sure paste covers more
surface area than the paper.

Place top two corners of the
image on desired surface
and smooth out using your
brush. Start from the top
and work down. Then let dry.

Use a smoothing brush
for larger pieces.
Again, starting from the top
and working down.
Then let dry.
